Chevy - 5.850 Length Connecting Rods

New offering for Chevy Small Block to finish up that 434-inch build!

K1 Technologies has expanded their lineup of performance, H-beam **Small Block Chevrolet** connecting rods with this 5.850" length offering. Manufactured from 4340 steel and held to precise tolerances, these connecting rods are prepared to accommodate 434-inch Small Block Chevy builds.

- Designed for 434-inch Small Block Chevy builds utilizing a 4.000" or 3.750" stroke and taller compression height pistons
- Forged 4340 steel material provides strength and reliability through better aligned alloy grain flow
- Shot-peened surface treatment reduces potential stress risers to improve durability and service life
- Highly reputable ARP 2000 series fasteners included
- H-beam design provides proven strength
